```

Pred. No. is the number of results predicted by chance to have

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

NEDO human cDNA sequencing project supported by Ministry of
Economy, Trade and Industry of Japan; cDNA full insert sequencing:
Research Association for Biotechnology (RAB); cDNA library
construction: Helix Research Institute (HRI) (supported by Japan
Key Technology Center etc.); 5'-& 3'-end one pass sequencing: RAB,
HRI, and Biotechnology Center, National Institute of Technology and
Evaluation; clone selection for full insert sequencing: HRI and
RAB; annotation: HRI and RAB.

Result No.

Score

Query Match Length DB ID

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

```

The invention relates to a novel human fatty acid transporter, PSEC67 (AAB60388), and to cDNA encoding it (AAF27417). PSEC67 is responsible for the uptake of oleic acid into cells. The invention also relates to vectors and host cells comprising a PSEC67 nucleic acid; the recombinant production of PSEC67; an antibody against PSEC67; methods of screening for compounds which can regulate the uptake of long-chain fatty acids into cells; and the compounds thus identified. The PSEC67 protein and the

the

for

Fatty acid transporter protein and encoded gene PSEC67 cloned from human cDNA library, with activity of oleic acid incorporation, useful as target molecule of preventives or remedies of fatty-acid metabolic disorders.

Such diseases include cardiomyopathy, skeletal muscle discrders, or renal failure. PSEC67 nucleic acids may also be used in gene therapy for such disorders. The present sequence represents cDNA encoding PSEC67
